EDUCATION

- **Vellore Institute of Technology, Chennai** *Aug 2023 – 2027*
B.Tech, Computer Science and Engineering *CGPA: 7.69 / 10*
- **St. Francis School, Shamli** *2009 – 2022*
Higher Secondary

PROJECTS

Automated PII Detection & Redaction Pipeline 🔒

- Built a multi-format document processing system that identifies and redacts personally identifiable information before documents leave a trusted boundary, addressing a common data-exposure risk.
- Combined OCR text extraction with a YOLO-based detector for logo and image-region masking, so sensitive data is removed from both text and visual layers rather than text alone.
- Implemented audit logging for every redaction action, producing a reviewable trail of what was changed and when – the kind of evidence compliance and assessment workflows depend on.
- Designed the system as modular stages with batch processing, letting individual detectors be swapped or tuned without reworking the pipeline.
- **Tech Stack:** Python, OpenCV, YOLO, OCR

QuickMart – Community Share & Delivery Platform 🔒

- Developed a full-stack web application for coordinating local delivery and goods sharing between users.
- Implemented user authentication and session handling, applying server-side validation so authorization decisions are not trusted to the client.
- Built real-time status tracking over REST APIs with structured error handling across the client-server boundary.
- **Tech Stack:** JavaScript, React, REST APIs

Real-Time Eye-Tracking System 🔒

- Implemented gaze detection on live video streams using classical computer vision techniques, with per-frame visualization of results.
- Tuned the detection pipeline for stable performance on continuous input, handling lighting variation and frame-rate constraints.
- **Tech Stack:** Python, OpenCV

TECHNOLOGIES

- **Languages:** Python, JavaScript, Java, C/C++, SQL
- **Technologies/Frameworks:** React.js, OpenCV, YOLO, Git/GitHub
- **Subjective Expertise:** Data Structures & Algorithms, OOP, Networking Fundamentals
- **Certifications:** PCAP – Certified Associate Python Programmer (Python Institute); PCEP – Certified Entry-Level Python Programmer (Python Institute); English for IT B2 (GSE 59–75); Advanced Generative AI (IBM Career Education Program, Jul 2026)
- **Additional:** Solved 200+ data structures and algorithms problems on LeetCode, with consistent practice in arrays, graphs, and dynamic programming.

EXTRACURRICULARS

- Represented college in football and track & field, placing first in both the 1600m and 800m events; active marathon runner.
- Event Management Lead, Sports Club – planned and led execution of college-level sporting events.
- Marketing Lead, Socrates Club – drove outreach, promotion, and audience engagement for club initiatives.
